Plan your deck

Use this handy space to plan a deck that suits your requirements.

Start by drawing the area you'd like to deck out and then work out the number of boards required.

Our board width is 145mm. Each board has a 5mm gap between it and the next board (this gap is created by the decking clips), so the cover width is 150mm. Therefore, each board covers 0.735 of a square metre (ie approximately 3/4 sqm).

To estimate the number of boards that are required, just calculate the number of square metres your deck will cover, then divide that number by 0.735.

Example:

A deck of 5m x 4m has an area of 20sqm.

The number of boards needed is $20 \div 0.735 = 27.2$ boards. You should also allow 12 to 14 decking clips per decking board.

Important - This calculation is an approximate guide. Very few decks are nicely rectangular and so you'll have to allow for odd areas that may require you to cut the boards in ways that create more wastage than this simple calculation allows for. Therefore you should allow for at least 10% wastage. In some circumstances it may be helpful to tailor the size of your deck to make the most of each board length.

Remember that the following basic principles of setting out the boards may affect the number of boards you'll need to use:

Run the boards across the most common line of tread, not with it.

Separate all joints on adjacent boards by at least 2 bearers.

All deck pieces should be long enough to be secured to at least 3 bearers.

Customer Details:

Customer Name:

Job Reference:

DekBoard Colours:

Dark Oak Driftwood Anthracite Grey

Light Oak Moss Grey Luna Grey

Balustrade Colours:

White Golden Oak Anteak Rustic Oak

Forest Green Anthracite Grey Natural Oak Rosewood

Gates:

Yes No 2 Tread 3 Tread Other

Steps:

Rail Routing:

Diamond Square

Deck height off ground:

mm
